Forever Security Screens

Security and Storm Protection - Built to Last

Fixed Windows

Crimsafe fixed security and storm windows are non-moving panels that can be installed over the existing windows in your home. They cannot be effectively pried open, kicked down or cut; ensuring your home is safe and secure. Fixed window panels work with various types of windows; including louvers, double hung and sliding windows. They are custom designed to complement your home and provide your family the protection and peace of mind Crimsafe has become renowned for. Crimsafe fixed window panels are available in several frame styles and colors to match your home or business.

Crimsafe fixed window panels enhance your lifestyle and safety. They allow you to keep your regular windows open to help keep your home cooler in the summer and enjoy the fresh air all year round without compromising your safety or security. Crimsafe's Tensile-Tuff® mesh helps to reduce solar heat gain by 53% while allowing for unhindered visibility from your home. Crimsafe window panels also work as fly screens, allowing airflow in while bugs and other intruders are kept out!

Unlike traditional security grills or windows fitted with bars, Crimsafe is a stylish product that will complement any decor. Crimsafe products are nearly impossible to cut, kick down or pry open, ensuring your home is safe and secure. Crimsafe's stylish fixed windows enhance your home, while providing your family year-round safety and peace of mind.

Features & Benefits

Fixed Window Products

Expert installation	Crimsafe Security products are custom built off-site then quickly installed at your home by a Crimsafe Licensed Dealer.
Smaller frame sections	Boasting the strength of door frames, but with a smaller frame width.
Slimline design	Heavy duty protection without heavy duty looks – a cross-section reveals the frame is less than ½ inch thick and 1 3/8 inches wide.
Screw-Clamped™ security	Only Crimsafe clamps 304 Tensile Tuff® Security Mesh between 2 serrated pieces of metal, then drives a screw right through both mesh and frame to ensure a 'vice-like' grip...and beat more burglars.
304 Tensile-Tuff® security mesh	At .9mm in diameter, Crimsafe's Tensile-Tuff® stainless steel security mesh is up to 26% thicker than other mesh products on the market, making it stronger and harder to cut or penetrate.
Tamper-resistant stainless steel screws	Exclusive to Crimsafe. Screws can only be inserted or removed by a tool registered with Crimsafe. This ensures the integrity of your security system.
Custom built	Means a perfectly fitted job. Product can be made to fit the design and format of your windows.
Enhanced lifestyle	Crimsafe provides unhindered views, keeps out mosquitoes, and lets you keep a cool, safe house all year round.
Solar heat gain	Solar heat gain is reduced by up to 53% reducing dependence on air-conditioning.
Passes industry standards	Crimsafe always exceeds the relevant Industry Standards for security.
Range of colors	Crimsafe stocks a range of standard colors so that the system you buy complements your home.
Guaranteed for 10 years	Crimsafe warrants the product from defects in materials under the conditions of normal use for up to 10 years from the date of purchase. Please refer to our Care Guide for more information.

Applications

These window-types can utilize Crimsafe Fixed Window Panels:

- Sliding Windows
- Double Hung
- Jalousie Windows
- Awning Windows
- Picture Windows

All Crimsafe products feature our patented Crimsafe Screw-Clamp™ technology. Tamper resistant screws first go through a metal clamp, then through Crimsafe's Tensile-Tuff® mesh and then driven right into the frame, to hold the mesh in a "vice like" grip. This patented Screw-Clamp® gives Crimsafe screens enormous strength against attack, unlike inferior products that simply glue or wedge mesh into a frame.
