

BEAT MORE BURGLARS WITH THE ONLY SECURITY MESH THAT'S SCREW-CLAMPED™!

Crimsafe Doors

Crimsafe doors are attractive and strong...

Crimsafe security and storm doors cannot be effectively pried open, kicked down or cut; ensuring your home is safe and secure. Doors are available as hinged, sliding, bi-fold or stacking. Whichever style of Crimsafe door you choose, it can be custom designed to complement your home and provide your family the protection and peace of mind Crimsafe has become renowned for. Crimsafe doors are available in several frame styles and colors to match your home or business.

Crimsafe doors enhance your lifestyle and safety. They allow you to keep your regular doors open to help keep your home cooler in the summer and enjoy the fresh air all year round without compromising your safety or security. Crimsafe's Tensile-Tuff® mesh helps to reduce solar heat gain by 53% while allowing for unhindered visibility from your home. Crimsafe doors also work as fly screens, allowing airflow in while bugs and other intruders are kept out!

Unlike traditional security grills or doors fitted with bars, Crimsafe is a stylish product that will complement any decor. Crimsafe products are nearly impossible to cut, kick down or pry open, ensuring your home is safe and secure. Crimsafe's stylish doors enhance your home, while providing your family year-round safety and peace of mind.

Features & Benefits of Crimsafe's

Live safe with Crimsafe

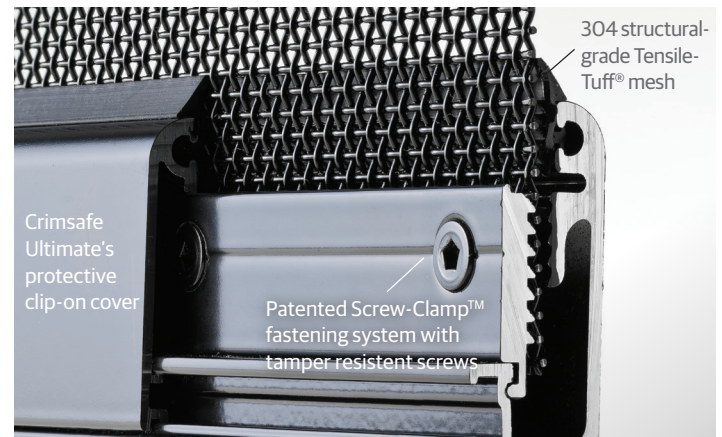

Door Products

Expert installation	Crimsafe Security products are custom built off-site then quickly installed at your home by a Crimsafe Licensed Dealer.
3-Point Locking	All our hinged and sliding doors come with a 3-point locking system as standard. Triple locks means added security.
3-Point Hinging	3 hinges give the door greater strength and makes it much harder to gain entry through the door.
304 Tensile-Tuff® security mesh	At .9mm in diameter, Crimsafe's Tensile-Tuff® stainless steel security mesh is up to 26% thicker than other mesh products on the market, making it stronger and harder to cut or penetrate.
Attractive Mid-rail option	Besides being an attractive feature of the door that can be positioned to match existing features of your home, our midrail boosts the door's strength and anti-jemmy properties. It also acts as a visual warning so you don't walk in to the door.
Patented Screw-Clamped™ security	Only Crimsafe clamps 304 Tensile Tuff® Security Mesh between 2 serrated pieces of metal, then drives a screw right through both mesh and frame to ensure a 'vice-like' grip...and beat more burglars.
Tamper-resistant stainless steel screws	Exclusive to Crimsafe. Screws can only be inserted or removed by a tool registered with Crimsafe. This ensures the integrity of your security system.
Custom built	Means a perfectly fitted job. Product can be made to fit the design and format of your current doors.
Enhanced lifestyle	Crimsafe provides unhindered views, keeps out mosquitoes, and lets you keep a cool, safe house all year round.
Solar heat gain	Solar heat gain is reduced by up to 53% reducing dependence on air-conditioning.
Passes Industry Standards	Crimsafe always exceeds the relevant Industry Standards for security.
Range of Colors	Crimsafe stocks a range of standard colors so that the system you buy complements your home.
Guaranteed for 10 years	Crimsafe warrants the product from defects in materials under the conditions of normal use for up to 10 years from the date of purchase. Please refer to our Care Guide for more information.

Applications

Increase security and enhance your lifestyle

- Anywhere that an attractive yet strong and secure door is required

All Crimsafe products feature our patented Crimsafe Screw-Clamp™ technology. Tamper resistant screws first go through a metal clamp, then through Crimsafe's Tensile-Tuff® mesh and then driven right into the frame, to hold the mesh in a "vice like" grip. This patented Screw-Clamp® gives Crimsafe screens enormous strength against attack, unlike inferior products that simply glue or wedge mesh into a frame.
